## **The Coca-Cola Export Corporation, CPS Pakistan's Commitment to AWS Standard**

TCCEC acknowledged that effective water stewardship practices to protect water source will contribute to the long-term success of the company as several of our operations are located in areas where water resources are affected by over exploitation, poor water management and the impacts of climate change. It strongly believes that water needs to be handled carefully to ensure a sustainable supply of water to meet the community needs and then finally to ensure its constant availability throughout the plant operations. In order to become a good water steward, we are working to reduce the amount of water we use in our operations, but also to regenerate and preserve water use, to protect local water sources for future generations. For that reason, TCCEC is committed to work with key stakeholders to address the issue of water management at a local level, but it also believes that Government has to take the lead in establishing over-arching water policies within which TCCEC and other water users can operate.

TCCEC is committed to Improve water efficiency in its manufacturing sites by 20% by 2030 (compared to a 2015 baseline), to Replenish 100% of the water we use in areas of water by 2030, through community-based partnerships and finally it is committed to develop its business practices in a way that is aligned with Alliance for water stewardship standard. Water is a key ingredient in our products and essential to our manufacturing processes. It is necessary that we ensure water quality, as per our food safety standards, as well as sustainable supply. Our Action on Water helps to support UN Sustainable Development Goal 6 on Clean Water and Sanitation. We have a responsibility to respect and protect water resources so responsible water management is a top priority of our company.

I commit to supporting TCCEC pursuit of responsible water stewardship.  
I will support the site's efforts to achieve the outcomes of water stewardship as defined in AWS Standard.  
I commit that site will attempt to engage relevant stakeholders throughout its efforts in an open and transparent way.  
I commit to coordinating with and supporting public-sector agencies in their efforts to address shared water challenges and in planning and implementing water related policies.  
I commit to make sure that the site will comply all water related legal and regulatory requirements.  
I will respect the right of workers on-site to have access to safe water, adequate sanitation and hygiene.  
I will support the site's efforts to continually improve and adapt its water stewardship actions and plans and ensure that the site will allocate resources required to implement the AWS Standard.  
Lastly, I commit to disclose the information on water stewardship program in lined with AWS Standard in a proper format.

Sincerely,

Name: Ejaz UI Haq
